

NATURAL LANGUAGE PROCESSING

HALL TICKET NUMBER : 2403A52394

BATCH 14

ASSIGNMENT 1.4

The screenshot shows a Jupyter Notebook interface with a terminal window open. The terminal displays a list of installed packages and their versions, including nltk, spacy, and various dependencies. The Gemini chat window on the right shows an error message: "LookupError: ..." and a detailed explanation of the error, stating that the necessary NLTK resource 'punkt_tab' could not be found. The error message also includes a link to the NLTK documentation for downloading resources.

The screenshot shows a Jupyter Notebook interface with a code cell containing the following code:

```
import nltk
import spacy

nltk.download('punkt')

[nltk_data] Downloading package punkt to /root/nltk_data...
[nltk_data] Unzipping tokenizers/punkt.zip.

text = """
Natural Language Processing is a branch of artificial intelligence that helps
computers understand, interpret, and generate human language.
"""

import nltk
nltk.download('punkt_tab')
from nltk.tokenize import word_tokenize

words = word_tokenize(text)
word_count = len(words)

print("Number of words:", word_count)

[nltk_data] Downloading package punkt_tab to /root/nltk_data...
[nltk_data] Unzipping tokenizers/punkt_tab.zip.
Number of words: 21

lower_text = text.lower()
print("Lowercase text:\n", lower_text)

Lowercase text:
natural language processing is a branch of artificial intelligence that helps
computers understand, interpret, and generate human language.
```

The Gemini chat window on the right shows an error message: "LookupError: ..." and a detailed explanation of the error, stating that the necessary NLTK resource 'punkt_tab' could not be found. The error message also includes a link to the NLTK documentation for downloading resources.
